

To Our Valued Customers:

Since 2004, Aire Technologies, Inc. has been committed to providing a full line of life safety products. You've placed your trust in us to be a high quality provider of products and service. We want to continue to earn and keep that trust. I am excited to announce that Aire Technologies has expanded our product offering, technical support, literature, and customer satisfaction!

Aire Technologies will be your premier supplier for:

- out-of-wall combination fire/smoke dampers for noncombustible construction
- grille-access (front-access) combination fire/smoke dampers for noncombustible construction
- airfoil-blade-style combination fire/smoke dampers, and
- corridor dampers.

In light of the recent dynamics of the world steel market, Aire Technologies has implemented efficient product designs while continuing to meet the stringent UL standards and providing top-quality products.

Consequently, our designs have changed for our combination fire/smoke dampers. We have acquired assets, tooling and certifications from Leader Industries (Creative Sheet Metal) that includes UL's, AMCA certifications, Miami-Dade NOA's and Texas Department of Insurance certifications. The Aire Technologies line will have a new look but will still deliver the same or better performance. The combination fire/smoke dampers will still meet the same standards for UL, ICC, NFPA, SMACNA, and CSFM.

In an effort to provide the best technical support, Aire Technologies is updating all of its design files, including Revit and CAD Drawings, installation instructions, and submittals. New files will be available shortly on Airetechnologies.com.

In addition to the newly acquired life safety devices we have also acquired all of the louver, penthouse, ventilator and hood assets and will soon be a full line provider of these premium extruded aluminum products with all their associated certifications.

Thank you in advance for your patience as we work through this transition. We appreciate your continued business. Thank you for being our partner!

Sincerely,

Business Development Manager
Aire Technologies, Inc.
